Acme Corp Philippines: HR & Retention Playbook

Effective Date: January 1, 2024
Prepared by: Acme Corp Philippines Human Resources (DOLE-Compliant)

1. Purpose and Scope

This playbook outlines the official Acme Corp policies tailored for our Philippine workforce. Following our latest predictive attrition modeling, this document heavily prioritizes interventions for long-tenured employees, compensation adjustments, role stagnation, and localized environmental factors (such as Metro Manila commuting and cultural workplace dynamics like *pakikisama*). It is designed to ensure compliance with the Department of Labor and Employment (DOLE) while aggressively mitigating our top churn factors.

2. Longevity & Career Fatigue (Top Priority)

Our predictive models indicate that **TotalWorkingYears (18.88%)** is the single largest factor in employee attrition. Employees with extensive industry experience are highly susceptible to career burnout or aggressive poaching by competitors in the BPO and tech sectors. To address this, Acme Corp Philippines mandates the following longevity benefits:

- **The "Bayanihan" Loyalty Program:** Upon reaching 5, 10, and 15 *TotalWorkingYears*, employees receive a tax-free loyalty cash bonus of PHP 50,000, PHP 100,000, and PHP 150,000 respectively, alongside a plaque of appreciation.
- **Paid Sabbatical Leave:** Employees surpassing 10 *TotalWorkingYears* are entitled to a fully paid 30-day sabbatical leave, entirely separate from their standard 15-day Vacation Leave (VL) and 15-day Sick Leave (SL) credits.
- **Expanded HMO for Dependents:** While standard HMO covers the employee, those with over 5 *TotalWorkingYears* automatically receive free premium HMO coverage for up to three (3) qualified dependents, covering pre-existing conditions.

3. Compensation, Hikes & Daily Rate

Compensation stagnation, specifically represented by **PercentSalaryHike (6.53%)** and baseline **DailyRate (1.90%)**, drives significant turnover amidst rising inflation in the Philippines. HR must enforce the following aggressive monetary interventions:

3.1 Annual Merit and Inflation Adjustments

Base salary increases are not solely performance-based; they must also account for Philippine core inflation.

- **Minimum Inflation Hike:** Regardless of standard performance, all non-PIP (Performance Improvement Plan) employees must receive a baseline 4% *PercentSalaryHike* annually to combat inflation.
- **Merit Multipliers:** High-flight-risk employees with an "Outstanding" or "Excellent" rating must receive a total **10% to 15% PercentSalaryHike**. If an employee has not received a hike of at least 8% in the last 12 months, HR is authorized to process an off-cycle adjustment.

3.2 De Minimis Benefits & Allowances

To maximize take-home pay without increasing tax burdens, Acme Corp maximizes DOLE-approved *De Minimis* benefits for employees whose *DailyRate* falls in the lower 30th percentile of their department:

- **Rice Subsidy:** PHP 2,000 monthly rice allowance.
- **Clothing & Laundry:** PHP 6,000 annual clothing allowance.
- **Medical Cash Allowance:** PHP 10,000 annually for out-of-pocket pharmacy expenses.

4. Role Progression & Stagnation Management

Career stagnation drives attrition heavily among mid-level professionals. The metrics **YearsInCurrentRole (5.55%)**, **JobRole (3.49%)**, and **JobLevel (3.12%)** require active career pathing.

4.1 The 3-Year Rotation Mandate

If an employee's *YearsInCurrentRole* reaches 3 years without a formal promotion, their direct manager must initiate a "Career Crossroads" dialogue. The employee must be offered one of the following:

- **Lateral Transfer:** A no-fault transfer to a different team or department (e.g., from Customer Success to Sales) to learn new skills.
- **"Acting" Capacity Role:** Temporary assignment to a higher *JobLevel* (e.g., Acting Team Lead) for 6 months, accompanied by a 10% OIC (Officer-in-Charge) allowance.

4.2 Role-Specific Hazard and Shift Allowances

Specific *JobRoles* (like Manufacturing Directors, Laboratory Technicians, or anyone on shifting schedules) face unique stressors. We mandate a **15% Night Shift Differential** (exceeding the DOLE 10% minimum) for work performed between 10:00 PM and 6:00 AM. High-stress roles automatically receive an additional PHP 3,000 monthly "Mental Wellness" stipend.

5. Training & Educational Subsidies

Continuous upskilling (**TrainingTimesLastYear: 3.28%**) is highly valued in the Philippine workforce as a path to upward mobility.

- **Mandatory Training Quotas:** Every employee must achieve a minimum of 3 *TrainingTimesLastYear*. If a manager fails to allocate time for this, the manager's own KPI will be penalized.
- **Third-Party Certifications:** Acme Corp partners with institutions like the Asian Institute of Management (AIM) and TESDA. Employees are entitled to PHP 50,000 annually in tuition reimbursement for approved certifications (e.g., Six Sigma, AWS, Data Analytics).

6. Workplace Culture & Managerial Dynamics

The Philippine work culture relies heavily on interpersonal harmony. Friction here, represented by **YearsWithCurrManager (2.49%)** and **EnvironmentSatisfaction (1.65%)**, causes silent attrition.

6.1 Managerial Fatigue and "Pakikisama"

If an employee's *YearsWithCurrManager* exceeds 4 years, the risk of favoritism ("palakasan") or interpersonal fatigue increases. HR mandates an automatic "Skip-Level 360 Review" directly with the Department Head. If friction is identified, HR will facilitate a "no-questions-asked" team reshuffle to provide the employee with a fresh reporting structure.

6.2 Environment & Commuter Support

Metro Manila traffic severely impacts *EnvironmentSatisfaction*. To mitigate physical exhaustion:

- **Company Shuttle Services:** Point-to-point shuttles are provided in major hubs (Alabang, Makati, Ortigas, Quezon City).
- **Flexible Work Arrangements (FWA):** Employees are entitled to a hybrid schedule (up to 3 days Work-From-Home) or staggered shifts (e.g., 6:00 AM - 3:00 PM) to avoid rush hour.
- **Free Office Meals:** The office pantry will provide subsidized catered lunches and free-flowing local coffee to build community and lower daily expenses.

7. Gender Diversity & Statutory Leaves

In compliance with Philippine laws and to support our diverse workforce (**Gender: 2.52%**), we provide robust protections above statutory minimums:

- **Maternity & Paternity:** 105 days of fully paid maternity leave (expandable for single mothers per the Solo Parents' Welfare Act) and 14 days of paid paternity leave (double the DOLE mandate).
- **Solo Parent Leave:** 7 additional days of paid leave annually for verified solo parents.
- **Safe Spaces Act (Bawal Bastos Law):** Zero tolerance for gender-based harassment. Dedicated, anonymous HR hotlines are established for immediate intervention.

8. Comprehensive HR Intervention Matrix

When algorithmic tools flag an employee as having a high probability of churn, managers must consult the following DOLE-compliant matrix to apply the appropriate, policy-backed intervention.

Primary SHAP Risk Factor	Recommended Policy Intervention	Approval / Action Owner
TotalWorkingYears > 10	Activate Bayanihan Loyalty bonus + Offer 30-day Paid Sabbatical.	HR Director
PercentSalaryHike < 8%	Trigger off-cycle 10-15% Merit & Inflation Adjustment.	VP & HR Partner
YearsInCurrentRole > 3	Initiate 3-Year Rotation Mandate; offer Acting Role with OIC pay.	Department Head
TrainingTimesLastYear < 2	Mandate 2 fully-paid external training courses (TESDA/AIM).	Direct Manager
YearsWithCurrManager > 4	Conduct Skip-Level Review; offer no-fault internal team transfer.	HR Business Partner
Low Environment Satisfaction	Approve staggered shift schedule or full WFH transition; enroll in Shuttle service.	Direct Manager
Low Daily Rate	Maximize DOLE De Minimis benefits (Rice, Clothing, Medical).	Payroll & Benefits
